EUROPEAN UNION

Part II: Certification

II. Health information	

I, the undersigned state/official veterinarian certify that:

- II.1. Breeding pigs exported into the Russian Federation are clinically healthy, born and reared in the EU, are not vaccinated against classical swine fever and Aujeszky's disease, originate from premises and/or administrative territory of the EU Member State, officially free from contagious diseases of animals, including:(1)
 - African swine fever during the last 3 years in the territory of the EU, excluding ☐ Sardinia; the administrative territories envisaged by the applicable Commission Implementing Regulation of the EU introducing changes to Commission Implementing Regulation (EU) 2021/605;
- · foot-and-mouth disease, during the last 12 months in the territory of the EU;
- · swine vesicular disease, during the last 12 months in the territory of the EU Member State;
- · Classical swine fever, Aujeszky's disease, Teschen disease during the last 12 months in the administrative territory of the EU Member State;
- · trichinellosis, tuberculosis, brucellosis, porcine reproductive and respiratory syndrome during the last 3 years in the premises;
- · leptospirosis (L. pomona)- during the last 3 months in the premises;
- anthrax during the last 20 days in the premises;
- II.2. The animals were not subjected to the exposure of natural or synthetic estrogenic, hormonal substances and thyreostatics.
- II.3. Animals have been in the place of origin since birth or not less than 6 months. The exported animals were kept for 21 days in quarantine under the supervision of the Official State Veterinarian of the exporting country (Place and date of quarantine) and the representative of the State Veterinary Service of the Russian Federation and during this period they were subjected to individual clinical examination with daily thermometry, had no contacts with other animals, were tested in official laboratory by the methods, approved in the EU Member State, with negative results (indicate the name of the laboratory, date and method of testing) for:
- classical swine fever
- porcine reproductive and respiratory syndrome
- brucellosis
- Tuberculosis
- Chlamydiosis
- Aujeszky's disease
- · transmissible gastroenteritis of pigs
- · swine vesicular disease
- · atrophic rhinitis
- II.4. Animals up to 6 months old descend from dams vaccinated against parvo-virus
- II.5. Before shipment the animals were subjected to veterinary treatments (indicate the method, date of treatment and dose of bioproduct):
- · vaccinated against swine erysipelas
- vaccinated against parvo-virus (only animals older than 6 months)
- dehelmintization
- treatment against leptospirosis
- treatment against ectoparasites
- II.6. The means of transport are treated and prepared in accordance with the rules approved in the EU;
- II.7. The route plan is attached.

Notes

Part I

- · Box I.11.: Name, address and, when applicable, approval number of the place of dispatch.
- Box I.16.: Point of crossing the border of the Russian Federation.
