Part II: Certification	II. Health information		
	I, the undersigned state/official veterinarian certify that:		
	II.1.	The animals, being exported into the Russian Federation are clinically healthy breeding cattle, born and raised in the EU Member State with pregnancy no more than 6,5 months, not vaccinated against brucellosis, foot-and-mouth disease, leptospirosis.	
	II.2.	Place and date of quarantine (not less than 21 days):	
	II.3.	Administrative-territorial unit:	
	(1)II.4.	The animals originate from premises and/or administrative territories:	
		(a) that are officially free from the following contagious diseases:	
		· rinderpest, contagious pleuropneumonia, foot-and-mouth disease, vesicular stomatitis, peste de petits ruminants – during last 12 months in the EU Member State;	
		· brucellosis, tuberculosis and leukosis – during last 3 years in the premises;	
		· Anthrax – during last 20 days in the premises;	
	· bluetongue – during the last 12 months in the premises and/or administrative territory where cattle was not vaccinated against bluetongue, or during not fewer than last 3 months in the premises where cattle was vaccinated against bluetongue.		
	(b) that there were no cases of the following contagious diseases:		
	· Johne, disease – during last 3 years in the premises;		
	· bovine viral diarrhea, besnoitiosis and infectious bovine rhinotracheitis – during last 12 months in the premises;		
	· leptospirosis – during last 3 months in the premises;		
II.5.	The animals, being exported into the Russian Federation are clinically healthy, originate from the herds where no cases of bovine spongiform encephalopathia (BSE) have ever been registered. The exported animals were obtained from the parents which breeding records have never registered BSE cases. The animals exported to the Russian Federation have been identified in compliance with the existing national program of mandatory identification of cattle in exporting country.		
II.6.	The animals were not fed by fodder of animal origin, manufactured from protein processed from ruminant animals, excluding milk proteins.		
II.7.	Animals have not been treated with natural or synthetic oestrogenic (excluding estrus synchronization), hormonal substances and thyrostatic preparations.		
II.8.	The exported animals were kept for not less than 21 days and in case the country of origin is not free from bluetongue or the country is vaccinating against bluetongue then animals were kept for 30 days in quarantine under the supervision of the state/official Veterinarian of exporting country and of the representative of Government Veterinary Service of the Russian Federation. The animals were healthy during this period and had no contacts with other animals, were tested in official laboratory by the methods, approved in the exporting country, with negative results (indicate the name of the laboratory, date and method of testing) for(2):		
	· tuberculosis		
	· Leucosis		
	· Paratuberculosis		
	· Brucellosis		
	· Bluetongue – cattle vaccinated against bluetongue once on day 28 of quarantine – by PCR, cattle are not vaccinated against bluetongue – twice on days 7 and 28 of quarantine by PCR and ELISA.		
	· Campilobacteriosis		
	· Trichomonosis		
	· bovine viral diarrhea according to point II.9. of the certificate		
	· infectious bovine rhinotracheitis according to point II.10. of the certificate		
	· Campilobacteriosis and trichomonosis testing is only required for bulls.		
II.9.	The animals, being exported into the Russian Federation, were:		
either	(3) ○	vaccinated against bovine viral diarrhea not earlier than 6 months and not later than one month prior to the export; ]	
	II.9.1.		

<b>Part II: Certification</b>	II. Health information		
	or	(3) <input type="radio"/>	not vaccinated against the bovine viral diarrhoea and tested with negative serological results during the quarantine; ]
	II.10.	The animals, being exported into the Russian Federation, were:	
	either	(3) <input type="radio"/>	vaccinated against infectious bovine rhinotracheitis not earlier than 6 months and not later than one month prior to the export; ]
	or	(3) <input type="radio"/>	not vaccinated against infectious bovine rhinotracheitis and tested with negative serological results during the quarantine; ]
	II.11.	The animals, being exported into the Russian Federation, were vaccinated against respiratory syncytial virus not earlier than 6 months and not later than 2 weeks prior to the export.	
	II.12.	Before shipment the animals were subjected to veterinary treatments (indicate the method, date of treatment and dose of bioproduct):	
		· Dehelmintization	
		· Treatment against leptospirosis	
	II.13.	The means of transport are treated and prepared in accordance with the requirements approved in EC.	
II.14.	Route plan is attached (3) <input type="radio"/> [yes]/ (3) <input type="radio"/> [no].		
Notes			
Part I			
	· Box I.11.: Name and address of the place of dispatch.		
	· Box I.16.: Point of crossing the border of the Russian Federation.		
	· Box I.19.: Number of animals		
	· Box I.25.: Identification of goods		
	Customs code and title: Use the appropriate Harmonised System (HS) code.		
	The inventory is made, if more than 5 animals are shipped, it is signed by the Official/state veterinarian of exporting country and constitutes an integral part of this certificate.		
Part II			
	(1)	Administrative territories, zones and time periods may be modified with a mutual agreement on the basis of the Memorandum of 4 April 2006 on zoning and regionalisation.	
	(2)	The test for abovementioned diseases may not be carry out if the exporting country is officially free from those diseases according the OIE Code requirements. Veterinarian who provides the certificates must indicate opposite the disease «The country-exporter is officially free from the mentioned disease, tests were not carried » and prove it by the signature and the stamp.	
	(3)	Delete as appropriate.	
Signature and stamp must be in a different colour to that in the printed certificate
